## 64 x 26 x 9MTR MACHINERY STORAGE SHED

<b>CLIENT</b>	Staines Esperance
<b>COMPLETED</b>	January, 2012
<b>PURPOSE</b>	New & Used Machinery Storage
<b>LOCATION</b>	Esperance, Western Australia

### PROJECT BRIEF

The client is the New Holland agricultural machinery dealer in Esperance, WA and had requirement for a large shed for storing the new and used machinery which they sell. The shed need to offer full weather protection and clear easy access for the machinery which includes headers, comb fronts, tractors and airseeder units to manoeuvre in and out of safely.

### WHEATBELT STEEL'S ANSWER

A 1664 square metre (64m x 26m x 9m) fully enclosed structural steel building with Universal Beam RSJ columns and parallel cord web trusses. The building design included two 16m clearspan door openings to facilitate clear access. Two 6.5m doors were included on the end of the shed along with a personal access door as well.

### CLIENT'S WORDS

*"We had a requirement for a large storage shed for new and used machinery so we rang Wheatbelt steel as they have a great reputation around the WA countryside and they were great to deal with. They were very accommodating and built a good high shed for us with great openings and they were very flexible on the layout of the shed for our own special purposes. The installation of the shed was trouble free, quick and professionally done. The quality of the workmanship and finished product is outstanding. We wouldn't have any hesitation recommending Wheatbelt Steel to anyone that had a requirement for a shed"*
